About Me

Full-Stack Web Developer with a background in heavy steel fabrication. Graduate of Dev Academy, skilled in JavaScript, React, Redux, and CSS. Enthusiastic about pair programming and collaborative project management. Excited to continue growing in the dynamic field of web development.

Projects

ParkingTix: Developed an app using JS, ReactThunk, and Typescript, integrating Gmail and ChatGPT APIs to dispute parking tickets. Explored teamwork, pair programming, and effective communication. Utilised Material UI for the frontend.

Experience

Dev Academy Aotearoa: Software Development Bootcamp, March - July 2023. Comprehensive training in modern web development and essential human skills, focusing on empathy, collaboration, and agile methodology principles.

Skills

Full-Stack Web Developer using JavaScript, React, Redux and Css.
Working In Teams - I was always up for pair programming and working in a team whenever I had a chance, because I believe that when pair programming we are able to learn from each other and also teach one another on things that we don't understand. That's one of the reasons I enjoy coding in a team.

Education

Dev Academy Aotearoa, Wellington
 March 2023 to July 2023

Lindisfarne College, Hastings

2014 - 2017

Hastings Boys High School, Hastings

2018

Hobbies & Interests

Gym: Finding peace, self-focus, and mindfulness.

MotorHead: Passion for cars with V8 engines.
